MasterClass Webinar

Presenting HydroCone

dorsia

Dear Doctors,

Join Dr. Marianelli in this webinar where he will show us how to use GCA's implant insertion device: HydroCone™. It's designed to make the insertion of silicone gel implants easier and safer optimizing your time during surgery and reducing the risk of complications.

The cone-shaped device has Hyaluronic Acid coating, providing a smoother and faster insertion of the implant while gently delivering it into the surgical pocket with a minimal touch technique.

Speaker

Dr. Stefano Marianelli,

Clinica Chirurgica Leonardo, Sovigliana-Vinci (FI)
